Vegetable patch
In our vegetable garden we have a plastic tunnel where Martin grows tomatoes, cucumbers, melons and different herbs. Outside, we grow lots of different vegetables, for the shops, but mainly for our guests, though we certainly eat a lot ourselves!

Events
In our party-room we receive private groups for different events, such as birthdays, confirmations, weddings, and we have even had an after funeral meal. Most of the meals are prepared from our own products.

Haarige Kuh Brewery

Cruise the lake to Thun and visit the Mountain Dairy Farm

Altitude: 950 m
Land: 26.3 ha grass 3.5 ha Wood

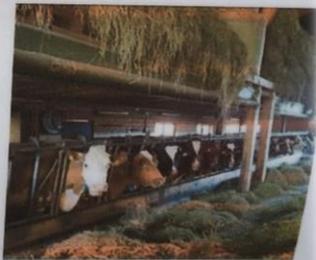

Different branches

Milking

We can keep around 30 cows. We deliver 152 000 litres of milk each year to the collecting point in the village, where the milk is collected every second day by the Aare milk AG and is sold to a manufacturer to produce dried milk, yoghurt, etc.

With part of the milk, we produce cream, toffees, yoghurt and fresh cheese to be sold on the farm and in the village shop.

10 cows spend the summer in the mountains on the Site Alp near Zweisimmen. There they produce Alpine-cheese, butter, yoghurt, Ziger, and cream. These products we order to sell in our shop and in the village shop. The youngsters spend the summer at Hohniesen or at Spittelweide

(alpine pastures) near Pohlern. In winter they stay in a stable at a neighbour's house near Schalleberg.

Hens

We keep about 30 hens for eggs to be sold in the farm shop, to be used for our guests, or for our own use.

Pigs

Our pigsty can keep up to 16 pigs, which we keep for meat, part of which is sold in the village shop, or in mixed packages directly to our customers. A large part is also used for the gastronomic part of our business.

Other animals

- Some cats
- Mice and woodworms 😊

Potatoes

We grow about 30 acres of potatoes, which are planted in collaboration with one of our neighbours, and used both for our events and direct sale.
